PROFILE

Creative and technically minded digital professional working across AI-enabled workflows, web development, digital marketing, graphic design, UI/UX, SEO and project delivery. Experienced in using AI agents and generative tools as working systems, not just chat tools, for development, research, content, creative production, strategy and workflow improvement. Combines strong visual judgement, technical capability and systems thinking with human-led QA for accuracy, brand alignment and production quality.

6
industrial websites managed

CORE FOCUS

AI Workflow Design • Digital Marketing & Content • Web Development & UX • Visual Design • SEO Support • Research • Project Management

EXPERIENCE

WordPress Developer | Digital Project Manager | UI/UX Designer

Aug 2025 – Present

Bezaleel Media

- Manage six industrial business websites across performance, content, functionality, security, UX and ongoing technical improvement.
- Lead digital projects from requirements and planning through development, QA, stakeholder review and delivery.
- Use Claude Code and other AI agents for development, troubleshooting, UI implementation, rapid prototyping and reusable project workflows, with human review before deployment.
- Support SEO through website hierarchy, crawl accessibility, metadata management, content structure and technical improvements.
- Translate business and marketing requirements into practical digital solutions, lead-generation journeys and improved team workflows.

Graphic Designer & Paid Ads Specialist

Jan 2025 – May 2025

Lonja Beauty Studio

- Created social and paid-campaign content across Meta and TikTok, combining brand design with performance-led creative decisions.
- Used AI-assisted research and ideation to support messaging, campaign concepts and content development while maintaining brand consistency.
- Monitored campaign performance and contributed to results of up to 70% higher click-through rates through creative optimisation and campaign management.

WordPress Developer – Freelance

Feb 2025

Kayailees Mobile Florist

- Designed and developed a responsive WordPress website aligned with the client's brand and business requirements.
- Created a mobile-first interface with clear navigation, product listings and booking functionality.
- Structured content and user journeys to clearly communicate services and support customer enquiries.

Graphic Designer | WordPress Developer | Business Analyst

Nov 2024 – Mar 2025

Paul-R Trade and Technologies

- Developed and launched a complete e-commerce website using WordPress and WooCommerce, including secure payment functionality.
- Translated business requirements into website functionality, content structures and digital customer journeys.
- Developed brand assets and completed theme/plugin customisation, SEO improvements and performance optimisation.

Graphic Designer

Jul 2023 – Oct 2024

Jona & Leo Designs

- Developed campaign graphics, layouts, UI assets and promotional materials across multiple brands.
- Translated marketing objectives and brand guidelines into clear visual communication using typography, hierarchy, colour and illustration.
- Collaborated with marketing teams and managed multiple creative deliverables across changing briefs and deadlines.

SELECTED AI & DIGITAL WORKFLOWS
